

Job Opportunity: Senior Cloud DevOps Engineer

Company: Horizon Cloud Systems

Role Summary:

Horizon Cloud Systems is hiring a Senior Cloud DevOps Engineer to scale our multi-region Kubernetes infrastructure and automate high-throughput CI/CD release pipelines.

Key Responsibilities:

- Design, deploy, and maintain multi-region AWS infrastructure using Terraform and Ansible.
- Build resilient CI/CD pipelines using GitHub Actions and ArgoCD.
- Monitor infrastructure health, configure Prometheus and Grafana alerts, and join on-call rotation.
- Harden infrastructure security following SOC2 and ISO27001 standards.

Requirements:

- 5+ years experience in DevOps, Site Reliability Engineering, or Cloud Architecture.
- Deep expertise in AWS services (EKS, RDS, VPC, IAM, CloudFront).
- Strong proficiency in infrastructure as code (Terraform).
- Solid coding skills in Python, Go, or Bash for automation.

Nice to Have:

- AWS Certified Solutions Architect or CKA (Certified Kubernetes Administrator).
- Experience with FinOps and cloud cost reduction.
- Familiarity with Kafka or distributed event streaming.

About the Company:

Horizon Cloud Systems delivers enterprise-grade cloud management software for Fortune 500 companies.

Why Join Us:

Join an engineering-first culture with complex scaling challenges, modern tech stack, and 100% remote flexibility.

Benefits:

- Competitive base salary (,000 - ,000) with generous equity grants.
- Comprehensive medical, dental, and vision insurance with zero employee premium.
- 401(k) retirement plan with 4% immediate employer match.
- Unlimited paid time off (PTO) and ,000 yearly home office stipend.

Equal Opportunity:

Horizon Cloud Systems is committed to creating a diverse environment and is proud to be an equal opportunity employer.
